SUMMARY

I have had the opportunity to contribute to **five TÜBİTAK R&D** projects, **two** of which were on an **international** scale. Furthermore, I have hands-on experience in fields such as Large Language Models (LLM), machine learning, blockchain technology, end-to-end product development, and IT helpdesk support

CERTIFICATES

CompTIA Security+ 20 July 2025

- Focuses on broad security concepts, architecture, operations and management

CompTIA Network+ 04 July 2025

- Comparable to **CCNA** certificate, it focuses on fundamental network activities.

Cisco CyberOps Associate 02 June 2026

- Along With CyberOps Associate, i was also given CCNA1, Linux Unhatched, Intro to CyberSec. These Badges are given by Akbank Akademi

WORK EXPERIENCE

AI Developer Intern - İNOSENS February 2026 - July 2026 (6m)

Developed Kiosk based Virtual Assistants for **Defacto** under **ITEA4 CAPE international** project, and Assisted **FLaction** project

- I acted as a **main developer** for this project. Integrated LLM, machine learning system, new backend API architecture as well as frontend architecture. **Fully developed** end to end given what Defacto is specified and allowed. Also assisted with FLaction development side that implements Federated Learning.

Software Engineering Intern - Finrix July 2025 - October 2025 (4m)

I worked on a forecasting neural network model and blockchain arbitrage bot for two seperate TÜBİTAK projects.

- Developed a forecasting NN for Gas prices in Eth chains. **I Improved** Error loss by **%50**, Training time by **%90**, added new layers, hyperparameters, tested and tuned parameters, made a CI/CD pipeline
- Developed blockchain scripts and Python modules for an arbitrage bot. Designed the Python components to analyze market conditions, integrating with the blockchain scripts to enable the main bot to execute profitable trades in under 0.07 seconds.

IT Support Intern - Istanbul Aydın University September 2024- June 2025 (9m)

- Installed and configured computers, cameras, and IoT devices, including crimping and deploying RJ-45 Ethernet cables for network connectivity
- helped anyone who needed technological support (**Helpdesk**)

EDUCATION

Bachelor of Computer Engineering (English) YDS - 91.25 - **English Advanced (C1)**

Istanbul Aydın University | 2022 – 2026
